

Why PacTrac Telematics?

Vehicle Intelligence

The PacTrac® telematics system gives you real-time access to valuable information about your fleet and drivers, allowing for better fleet management and improved efficiency.

Increase Profitability

Measure route performance and lane profitability to improve future route planning, reduce out-of-route miles and eliminate hours of service violations, saving you time and money.

Universal Coverage

Thanks to a reliable network of over 100 wireless carriers across the United States and Canada, the PacTrac telematics system keeps fleets connected with their drivers and vehicles.

Staying Connected

With more frequent data downloads you can monitor company equipment, cargo and driver performance more closely.

- Reliable data management, integration and communication between company and driver.
- Real-time asset visibility.
- Increase route efficiency and management of trips.
- Improve fuel management and fleet maintenance.
- Improve compliance and safety.
- Acquire and retain quality drivers.
- Custom application development.

Driver Performance

Every PacTrac system comes equipped with an advanced on-board computer that tracks various driver events that can enhance vehicle performance and safety.

Driver Satisfaction

Ensure data accuracy and remove paper-intensive processes through the automated collection and communication of trip-sheet data.

Performance Reporting

Manage key driver and vehicle performance with on-demand or scheduled reports, dashboards and scorecards through PacTrac's online web-hosted fleet management tool. And with electronic data, administrative costs are reduced.

24/7 Visibility

PacTrac's online web-based fleet management tool allow fleet managers and service managers access to information anytime, anywhere you connect to the internet.
